

# APORTANDO MÁS VALOR AÑADIDO

## BETANZOS HB, S.L.

Date 27.11.2015

# HISTORY

- 1975 TAFISA founded TRADEMA factory in Betanzos to produce high density wood fibre board (HB). The initial capacity of the line was 50.000 m<sup>3</sup>/year.
- 1986 New improvements took place at the factory with the aim to increase production up to 70.000 m<sup>3</sup>/year
- 1993 SONAE is the new partner of TAFISA.
- 1996 The evaporation plant started for the waste water treatment
- 2008 Improvement of waste water treatment:
- Enlargement evaporation plant capacity installing pre-evaporator
  - New specific boiler for burning waste water fibers concentrate
  - Reverse Osmosis plant for condensate treatment.
- 2015 Foundation of BETANZOS HB S.L., from the sale of the assets by Sonae Group.

# REMARKS

- There are only few factories in Europe producing HB.
- Very good quality of HB, based on short fiber eucalyptus wood, worldwide recognized.
- TABLEX product it is “Natural Fiber Board”, made only with wood and water, using thermoplastic properties of lignin, without chemical glues adding.
- BETANZOS HB produces HB with waste from the forestry industry.
- Most wood suppliers come from 50 km around area.
- Nowadays, we export 80% of the production.
